

## IMTMA Training: IMTMA Celebrates Completion of 25 Batches in “Finishing School”

---

The Finishing School in Production Engineering, an initiative by the Indian Machine Tool Manufacturers' Association (IMTMA) to train engineers on all aspects of production engineering has successfully completed 25 batches of training ever since it began with the first batch in September 2010.

Expressing his views on the impact of Finishing School on the manufacturing sector, Mr. P.G. Jadeja, President, IMTMA said, “A well trained manpower is essential to give strong support to manufacturing and increase productivity. As one of the premier institutes recognized for training in production technology in India, IMTMA Productivity Institute has been conducting a Finishing School to train engineers on all aspects of manufacturing with CNC technologies.”

Concurring with Mr. Jadeja's statement, Director General, IMTMA, Mr. V. Anbu said, “The course enhances the skill sets of fresh engineers in mechanical engineering. We give students a blend of theory and practical sessions, hands-on training on CNC Turning and Machining Centres with industry visits.” He further elaborated, “The training programme acts as a major cost effective option for industry in training their fresh recruits and ensuring that their engineers come well prepared to take over their job responsibilities.”

Students who have undergone training at IMTMA Technology Centre have given positive feedback:

- “Mechanical engineering students in their colleges do not have access to machines that are found at IMTMA Technology Centre. Doing this course, students definitely get the requisite hands-on experience to be industry ready and able to deliver from Day ONE of joining the industry”. – Ganesh Kashyap, 8<sup>th</sup> Semester student from Jain College.
- “What they teach in college is the theory of machines. We won't find the CNC machines. Finishing School in Production Engineering teach us everything including the entire programming of machines and how to handle the same. The course is very effective for those wanting to make a career in the manufacturing industry.” – Vinay, 7<sup>th</sup> Semester student from Jain College.

IMTMA training activities and skill development initiatives have been well appreciated by the manufacturing industry. Overall IMTMA's exclusive 4 weeks duration course has been ideal for new recruits / fresh engineers. Engineers from leading manufacturing companies in India who have undergone this course were able to achieve productivity and quality improvements in their projects by implementing some of the key learnings. More details of the Finishing School in Production Engineering is available on the website [imtmatraining.in](http://imtmatraining.in).
